## Science Based Targets Call to Action Commitment Letter

Our company wishes to join the growing group of leading companies that are setting emissions reduction targets in line with what climate science says is necessary. By doing so, we recognize the crucial part the business community can play in minimizing the risk climate change poses to the future of our planet.

We commit to develop a science-based emission reduction target within the next 24 months in line with the definition and criteria as stated on <http://sciencebasedtargets.org/commit-to-setting-science-based-targets/>.

We acknowledge that our commitment will be recognized on the Science Based Targets initiative website as well as on the websites of We Mean Business and CDP.
